### 4. FIRST AID MEASURES

**Show this SAFETY DATA SHEET to a doctor.**

- INHALATION:**
- Remove the victim from immediate source of exposure. Move victim to fresh air, if it can be done safely, and keep comfortable.
  - If victim's breathing has stopped, perform artificial respiration.
  - Administer oxygen if victim's breathing is difficult or irregular.
  - Get medical help.
- SKIN:**
- Remove and isolate contaminated clothing, shoes, and leather goods immediately and take a shower.
  - Rinse affected areas (skin) with non-abrasive soap or mild detergent and large amounts of running water. Wash contaminated clothing before reuse. Get medical help if irritation develops and persists.
- EYES:**
- Rinse eyes cautiously with clean running water for at least 15 minutes, while holding eyelids apart. Remove contact lenses after 5 minutes if present and easy to do. Continue rinsing while holding eyelids apart.
  - Seek medical help if irritation continues.
- INGESTION:**
- If swallowed, DO NOT induce vomiting, unless instructed to do so by poison control center or doctor.
  - Have person sip a glass of water if able to swallow.
  - Never give anything by mouth to an unconscious person. Get medical help.
- NOTE TO PHYSICIAN:**
- There is no specific antidote. All treatment should be based on observed signs and symptoms of distress in the patient.
- POTENTIAL HEALTH EFFECTS, ACUTE AND DELAYED:**
- No significant adverse effects expected with normal use.
  - Effects of exposure (inhalation, ingestion, or skin contact) to substance may be delayed.

### 5. FIRE FIGHTING MEASURES

- SUITABLE EXTINGUISHING MEDIA:** **Small fires:** Dry chemical powder, carbon dioxide (CO<sub>2</sub>), water spray or alcohol-resistant foam  
**Large fires:** Water spray, fog, or alcohol-resistant foam
- FIRE INVOLVING TANKS:** Cool containers with flooding quantities of water until well after fire is out. DO NOT get water inside containers.
- UNSUITABLE EXTINGUISHING MEDIA:** DO NOT use high volume water jet, due to contamination risk.
- SPECIFIC EXTINGUISHING METHODS:** Fight fire from maximum distance. For massive fire, use unmanned hose holder or monitor nozzles. Collect contaminated extinguishing water separately; do not allow contaminated water to reach the sewage or effluent systems.
- SPECIFIC HAZARDS ARISING FROM COMBUSTION PRODUCTS:** In case of fire, the formation of Carbon dioxide (CO<sub>2</sub>), Carbon monoxide (CO), Nitrogen oxides (NO<sub>x</sub>), and Hydrogen chloride (HCl), can be expected.
- PRECAUTIONS FOR FIRE FIGHTERS:** Fire fighters should wear full protective gear including self-contained breathing apparatus (SCBA). Fight fire from safe distance. Evacuate nonessential personnel from the area to prevent human exposure to fire, smoke, fumes, and vapours. Clean all clothing before reuse. Severely contaminated clothing that cannot be adequately decontaminated must be

disposed as hazardous waste. Shower with soap and water after contact with chemical product.

**FURTHER INFORMATION:**

- If possible, safely move undamaged intact containers away from the area around the fire.
- Keep containers cool by spraying with water if exposed to fire.
- Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.
- In case of fire and/or explosion do not breathe fumes.

**6. ACCIDENTAL RELEASE MEASURES**

**SPILL OR LEAK:**

**PERSONAL PRECAUTIONS:**

Avoid contact with skin and eyes. Do not touch or walk through spilled material. Do not inhale spray or fumes.

**PROTECTIVE EQUIPMENT:**

Wear personal protective clothing and equipment (see section 8).

**EMERGENCY PROCEDURES:**

Keep people and animals away. Eliminate all ignition sources (no smoking, flares, sparks, or flames) from immediate area. All equipment used when handling the product must be grounded.

**ENVIRONMENTAL PRECAUTIONS:**

Use water spray to reduce vapours or divert vapour cloud drift.

PREVENT spilled material from entering waterway and sewer systems, basements, and confined areas. If the product contaminates rivers and lakes or waterways immediately inform respective authorities.

**METHODS AND MATERIALS FOR CONTAINMENT:**

Contain and absorb liquid spills with inert material, remove by scoop or vacuum. Use approved industrial vacuum cleaner for removal and place in clearly marked waste containers.

**METHODS AND MATERIALS FOR CLEANING UP:**

Contain spillage, and then collect with non-combustible absorbent material, (e.g., sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Use clean, non-sparking tools to collect absorbed material.

**SECONDARY DISASTER PREVENTION MEASURES:**

**7. HANDLING AND STORAGE**

**PRECAUTIONS FOR SAFE HANDLING:**

- Suitable Technical Measures
- Suitable Precautions
- Prevention of contact

- Always store fungicides in their original containers, which include the label listing ingredients, directions for use, and first aid steps in case of accidental poisoning.
- Never transfer fungicides to soft drink bottles or other containers. Children or others may mistake them for something to eat or drink.
- Wear suitable protective clothing which include chemical-resistant overalls, footwear, socks, dust mask, eye shields and gloves.
- Wash hands before eating, drinking, chewing gum, smoking, or using the toilet. Wash hands, arms, and face after application. Wash gloves and contaminated protective clothing daily before reuse.

**CONDITIONS FOR SAFE STORAGE:**

- Suitable Technical Measures
- Separation measures from incompatible substances and mixtures

- Keep out of reach of unauthorized persons, children, and animals. Always store fungicides in their original containers, which include the label listing ingredients, in a cool, dry, and well-ventilated area out of direct sunlight.
- Segregate from foods and animal feeds.
- DO NOT reuse the container for any other purpose.

generated use local exhaust ventilation controls. Facilities should be equipped with an eyewash station and a safety shower. Where necessary, seek additional occupational hygiene advice.

**Respiratory Protection:** Where exposure through inhalation may occur when handling and/or when preparing the spray mixture, wear a face mask. If the product is used in confined spaces a respirator suitable for protection from dusts and mists of pesticides is adequate.

**Hand Protection:** Wear chemical-resistant gloves made of any waterproof material such as nitrile rubber. Glove thickness: 0.5 mm

**Eye Protection:** The use of safety goggles (full-face shield) is recommended.

**Skin and Body Protection:** Wear suitable protective clothing which include chemical-resistant overalls, footwear, socks, dust mask, eye shields and gloves. Remove and wash contaminated protective clothing daily.
